Safe Walking Route Assurance

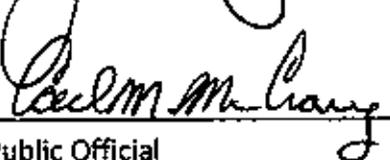

I have reviewed the attached maps of bus routes within one road mile of each school in the Kalama School District. These routes were evaluated by staff of KWRL Transportation Cooperative. They have identified which bus stops within the one mile distance of the destination school are considered as safe to walk to school and which bus stops are not safe to walk to school.

I have concluded that I am in agreement with the review completed by KWRL. I agree that the stops that have been identified as unsafe do not have a safe walking route to school and that these students should be transported to school via school bus.
